OBJECTIVES

Website/Mobile App that allows the management and guarantee the security of passwords

The project is to develop a reliable credential storage system designed to protect sensitive data and ensure maximum security. The system includes a password generator and allows users to easily add, edit and delete their credentials, all accessible via web browser and mobile application.

TECHNOLOGIES TO USE

	FRONTEND
	<div><div>HTML</div><div></div></div> <div><div>JS</div><div></div></div> <div><div>CSS</div><div></div></div>
	BACKEND
	<div> python™</div> <div></div>
